Recommendation letter for Mr Josep Lluís Carreras González

To whom it may concern,

It is my pleasure to write a recommendation letter on behalf of Mr Josep Lluís Carreras González, who worked at IMB-CNM in the period 2001-2004 under my guidance and supervision. During his stay at IMB-CNM, Mr. Carreras worked in the field of silicon pressure sensors developing measurement procedures and performing electrical characterization tasks on pressure sensor devices. I learnt to know him as a highly motivated, hardworking, rigorous, and honest person. He also showed to be a quick learner, particularly when it comes to acquiring technical skills, although that was his first contact with experimental research in pressure sensors. In addition, we very much appreciated his warm and open personality, which enables him to easily establish contacts and to work under cooperation schemes. Therefore, I would like to strongly recommend him for a post either in Industry or in Academia.

Sincerely yours,

Francesca Campabadal

Dr. Francesca Campabadal
Professor of Research
